

Ever...
...Spent Too Much For Advertising?
...Wondered if you are getting Your Monies Worth?
...Felt Confused about Where to Advertise with a Limited Budget?

Promise: One secret revealed here will revolutionize the way your advertising!

As with any industry, there are secrets to success that it take most professionals years of practice and experience to gain. In the wake of this learning curve, millions of dollars are wasted in business assets by confusion riddled professionals only seeking the best way to promote their company. In an ideal situation, there would be a one-stop, all inclusive resource advisors providing trustworthy guidance on optimizing exposure while minimizing the astronomical costs of advertising. To be sure, the cost of such expertise would absorb any savings in time, money, or mistakes by a single individual or company struggling to advertise on a shoe-string budget. Until NOW!

The Secret is...

Quite often, companies battle to compose complex advertising plans by comparing circulation, rates, industries, and audiences for magazines, newspapers, directories, and journals just for a first round analysis for budget expectations. Before any advertising dollars are sacrificed based on last years profit performance, using the same system that did not work from previous years, massive amounts of resources are exhausted by the simple act of preparing to advertise. As a company moves through an advertising year, in the turmoil of ad preparation, submission, and tracking, the constant stream of lost advertising dollars continues to drain an already drought ridden advertising campaign until, in desperation, more advertising dollars are cut from the budget or new monies are pour into the funnel to replace the old. It is so often the case that this phenomenon is blamed on inflation or inability to adequately measure return on investment. In an effort to expand profit, most companies fail miserably by expending company resources, cutting advertising resources, or pouring more money into advertising sieve without ever looking for the truth or suspecting the existence of a better way. In truth, the secret to gaining more revenue return through your advertising dollars is to advertise in more places, more effectively, and with less cost.

“Why Didn’t I Think of That!”

This is probably not a great news flash. Advertise in more places? Make Advertising cost less? Advertise more effectively? A first year Advertising student understands the simple truth of these three rules. Why, then, are these rules so commonly broken or forgotten after moving into the real world? It is not that the real world does not allow these rules to be practiced because people who know how are getting the revenue they need everyday!
